## CLS advances on EPICS tools and environment

*Wednesday, April 17, 2024 4:05 PM (10 minutes)*

This flash talk presents some of the current tools used in the EPICS infra-structure in the Canadian Light Source (CLS). In addition, it aims to explore some improvements that Control and Instrumentation group (CID) is currently working on, which includes adopting a new operating system and a new display manager to replace EDM.
